# CONTRACTOR 3083

## Oracle Consultant

---

- Integrate Tapestry pages with Hibernate via Spring service.
- Wrote wrapper over OID (LDAP). Wrapper APIs include creating/amending users, adding/removing users membership from roles, expire users, lock/unlock users etc.
- Code review
- Documentation

### **Technology**

J2EE - Tapestry/Spring Framework/Hibernate

### **Environment**

Weblogic Server, Oracle 9i

## ORACLE, India / Assignments

July 2001 - Nov 2005

I was working with AppsIT - Marketing team as IT Senior Consultant. AppsIT - Marketing group has a suite of applications used by Oracle Marketing community. The main objective of this group is to develop marketing related applications to market/advertise/promote Oracle's products/services and to collect responses of all the users (prospects) for all marketing activities (Campaigns, Events, Seminars, Mail etc). Marketing and Sales representatives use this data to increase Oracle sales. Worked extensively on Oracle 11i(11.5.10)

### **1. OMO PRODUCT IMPLEMENTATION (11.5.10)**

Worked on following four models to implement OMO within Oracle.

- Campaign Workbench (OMO Product)

Campaign Workbench enables user to perform pre-campaign analysis and acts as an entry point for the process of planning, creating, and executing Campaign Schedules

- Audience Workbench (OMO Product)

Audience Workbench enables marketing managers to create campaigns that use customer data to target a specific audience. This module can access data from the Oracle sales and marketing modules and present it in a single screen to help managers identify the best customers to target for up selling or cross-selling.

- Oracle Content Manager (OMO Product)

Oracle Content Manager (OCM) is the content management system for Oracle Marketing. Oracle Marketing can store Marketing Cover Letter, attachments. It also help setup approval role.

- One on One Fulfillment Server (OMO Product)

One on One Fulfillment server is the content management system for Oracle Marketing. Oracle Marketing can store Marketing Cover Letter, attachments. It also help setup approval role.

### **Responsibilities**

- Gap analysis between custom application and Oracle Apps 11.5.10
- To perform detailed design based on gaps between custom application and oracle standard OMO product.
- Base on gaps provide technical solution and prepare technical documents
- Write extensions using Oracle Application Framework, PL/SQL
- Data Migration from Custom application to Oracle Apps by using standards oracle pl/sql packages.
- Build and execute unit tests and unit plans. Review integration and regression test plans created by QA.
- Work closely with Product Managers, QA, and Support Teams in identifying problematic functionalities / flows.
- Tune complex SQL queries and views to boost performance
- Code review

# CONTRACTOR 3083

## Oracle Consultant

---

### **Technology**

Oracle Application Framework, PL/SQL, Workflow Builder

### **Environment**

Oracle 11i (11.5.10) CU2, Oracle 9i

## **2. DO NOT CALL APPLICATION (DNC)**

This application will help to verify if the telephone number was present in Oracle DNC repository or not. The Do Not Call list implementation at Oracle currently takes into consideration the US Do Not Call data and UK Corporate Telephone Preference Service data.

### **Responsibilities:**

- Involved in analysing client requirement and writing Technical Documents
- Sys admin jobs like Creation of Users, Responsibilities and Menus etc
- Developed entire application.

### **Technology**

Oracle Application Framework, PL/SQL

### **Environment**

Oracle 11i (11.5.10) CU2, Oracle 9i

## **3. DIALOGUE MARKETING**

Dialogue Marketing allows a campaign manager to engage prospects in a stream of questions based on their profile information and survey response. Thus, Marketers can produce more qualified, well-developed leads for iSD (Internet Sales Division) by leading the customers through the lead funnel.

### **Responsibilities:**

- To develop Dialogue Marketing application.
- To implement dialogue branching based on user profile and survey responses.
- To integrate the dialogue application with GCD (Global Contact Database) for lead generation.
- To prepare dialogue UAT document.

### **Technology**

J2EE, PL/SQL

### **Environment**

Oracle 9i, OC4J

## **4. CAMPAIGN EXECUTION**

Campaign Execution aids Oracle Internal Marketing User to create, manage, deploy and track their Marketing Campaign. Oracle internal marketing user can collect leads online and do strategic marketing and analysis.

### **Responsibilities:**

- To develop Campaign Execution.
- To develop Intelligence Dashboard
- To develop reporting engine

### **Technology**

J2EE, PL/SQL

### **Environment**

Oracle 9i, OC4J

## **5. RECOMMENDATION PORTLET**

# CONTRACTOR 3083

## Oracle Consultant

---

Recommendation Portlet provides personalized recommendations, offers, and campaigns to Oracle.com visitors based on their navigation on the site. It is highly interactive and provides relevant content to individual visitors - delivering on the ideas of one-to-one marketing.

### **Responsibilities:**

- Prepare Design Documents.
- To develop Recommendation Admin UI for creating/editing/deleting recommendations.
- To render recommendation portlet to oracle.com visitors depending upon user profile/latest navigations.
- To implement current recommendation (ad for Oracle World, Apps World, Hot news) functionality.
- To integrate application with GCD (Global Contact Database) for lead generation.

### **Technology**

J2EE, PL/SQL, XML, XSLT, XPath.

### **Environment**

Oracle 9iAS, Oracle 9i

## **6. PARTNER MARKETING NETWORK (PMN) APPLICATION**

Partner Marketing Network aids Oracle Partners (Sun, Compaq etc.) create, manage, deploy and track their Marketing Programs. PMN helps partners carry out an online campaign. Partners can collect leads online and do strategic marketing and analysis.

### **Responsibilities:**

- To design and implement the application.
- To develop various Portlets and integrate them in the application.
- To help Oracle partners worldwide to create their Marketing Campaigns using PMN application.

### **Technology**

J2EE, PL/SQL, XML, XSLT, XPath.

### **Environment**

Oracle 9iAS, Oracle 9i, Oracle Portal

## **7. CVC, HQCC, EMS, ERA**

Worked on above four custom applications for oracle internal user. Completed in just two months.

### **Responsibilities:**

- Design & Development

### **Technology**

Java, JSP, PL-SQL

### **Environment**

Oracle 8i

## **SELECTICA CONFIGURATOR, India / Assignments**

**Feb 2001 - Jun 2001**

Online system for tracking the inventory and performing replenishment at multiple locations.

### **Responsibilities:**

- Requirements Study
- System Development
- Database design and Implementation

### **Technology**

Selectica Configurator, Java, PL/SQL

### **Environment**

Oracle 8i, Tomcat

# CONTRACTOR 3083

Oracle Consultant
