

Australian Infant Formula

Golden Dairies Australia is a specialist in the manufacture of Australian Infant Formula. Golden Dairies Australia – a subsidiary of Milk Powder Solutions, is one of only four manufacturers of Infant Formula in Australia and pleased to offer "OEM" branded Australia Infant Formula to international clients.

We have built a new plant to strict pharmaceutical requirements with current volumes of up to 10,000 ton per year.

Our Infant Formula blends are uniquely developed by our highly qualified dairy technicians to the most stringent international standards and can be customized for the country where they are to be distributed.

We manufacture Premium Infant Formula and will not compromise our reputation by producing sub-standard products to meet pricing restraints.

It is our belief that breast-feeding is preferable to powder formula, however, we understand that in many cases this is not possible or impractical. We guarantee the ingredients used in our infant formula are of the finest quality available.

We have clients in Australia, China, Vietnam, Pakistan, Nepal and the Middle East.
